rollz motion
electric

Next level independence

- Independent driving with joystick
- Switches seamlessly between three mobility-aid options
- Easy foldability that allows compact transportation
- Turns on the spot even in narrow spaces
- Low-vibration air tyres

Designed in the Netherlands

Walk or drive with Rollz Motion Electric

The Rollz Motion Electric is a versatile 3-in-1 rollator, transport chair & electric wheelchair that enables users to stay active and be supported throughout different stages of decreasing mobility.

Adaptable

Durable and practical solution for multiple mobility needs, from requiring some support to wheelchair use.

Push support

Features an automated pushing power that provides electric push support to ease pushing uphill on ramps, slopes, and hills.

Joystick

Equipped with joystick controller that allows for independent use of the electric wheelchair.

Modular

The electric system can be attached to any Rollz Motion version, providing users with the freedom to travel independently.
